20+

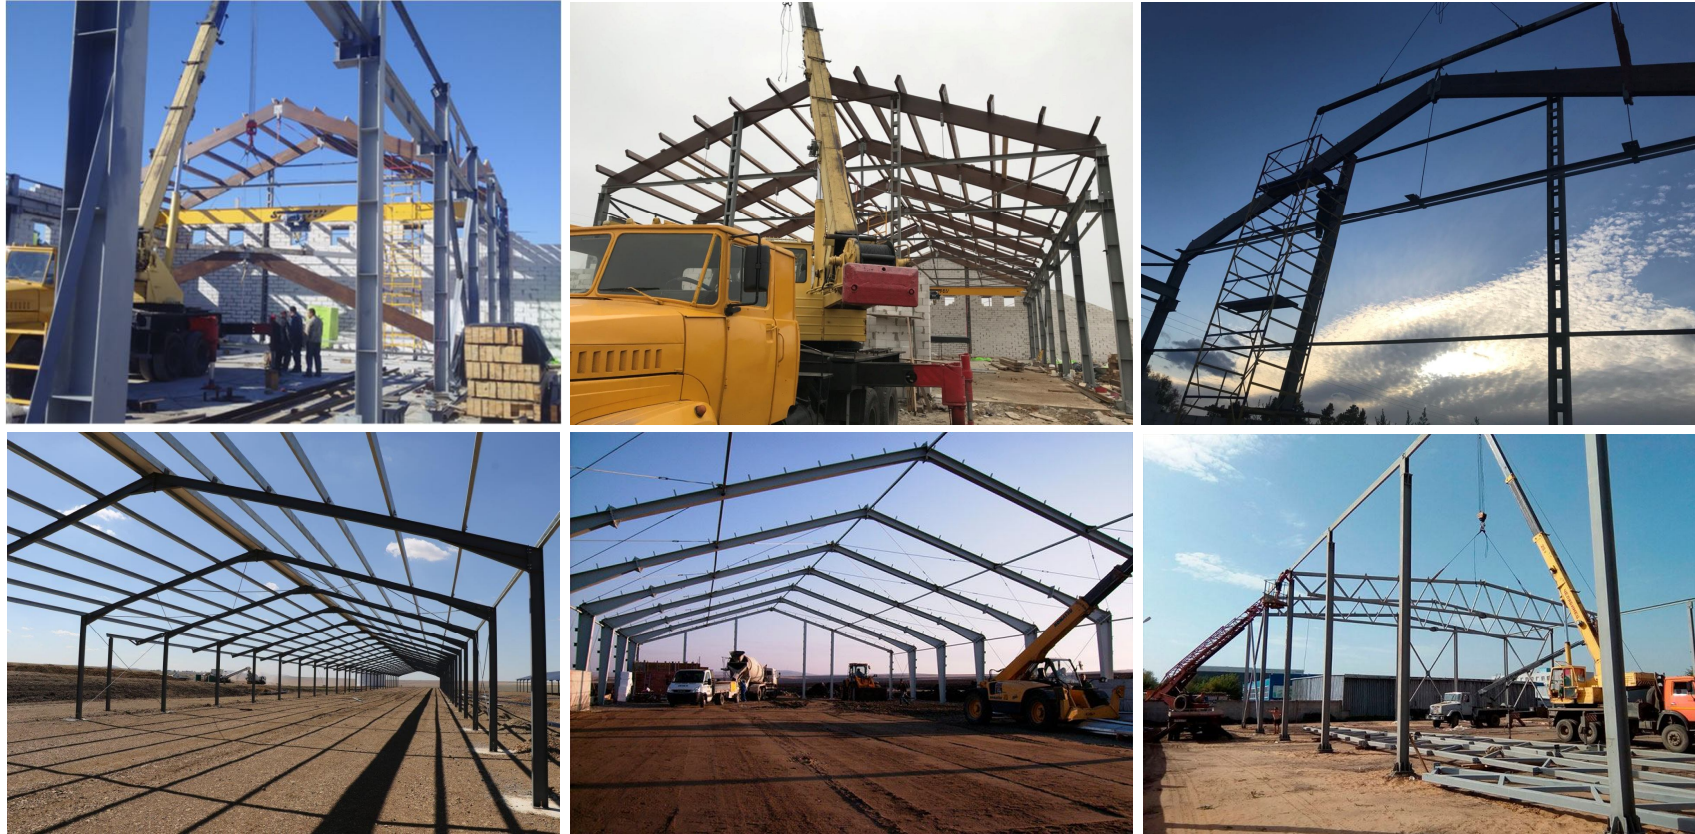

20 years of experience in construction and facility management

2

Grand Prix

Prizes of the National Union of Architects of Ukraine 2014 and 2018 for the implementation of intricate projects

1 Construction of production shops and industrial premises

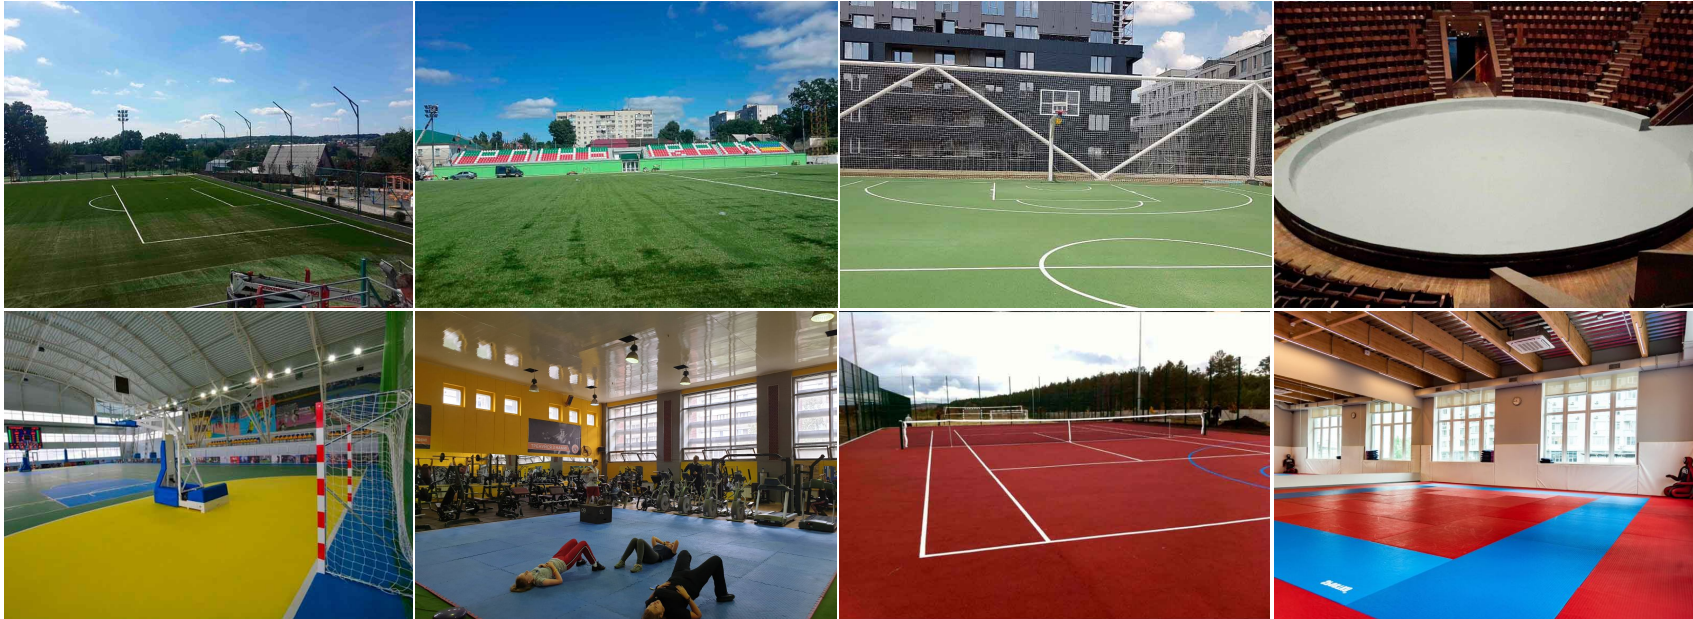

For more than 10 years we have been producing wooden large-span beams and structures, we use them for the construction of industrial workshops and production facilities for various purposes. We also design, manufacture and install metal structures and lightweight combined wood-metal structures at our construction sites.

2 Construction of hotel and entertainment complexes and their reconstruction

We have extensive experience in the construction of hotel and entertainment complexes, including hotels themselves, townhouses, restaurants, camp sites, swimming pools, leisure areas, venues for public events and much more.

3 Construction of stadiums, arenas, gyms, ice arenas, sports clubs, their equipment and turnkey equipment

Our many years of experience in the complex construction of stadiums, arenas, gyms, ice arenas, sports clubs, their finishing and equipping with turnkey equipment are at your service. Sports complexes, fitness equipment, etc., you can order all this in a complex way in our group of companies, without involving different contractors and performers, which greatly simplifies the relationship when performing a general contract, and reduces the time from making a decision to its implementation

4 Construction of agricultural facilities, (poultry houses, shepherds, cowsheds) RAS-workshops, horse arenas, stables

We offer our services in the design and construction of agricultural facilities. We carry out the design and manufacture of all parts and structures of this type of structure, we carry out their installation and possible reconstruction, and we also monitor compliance with technical conditions, special for each type of structure.

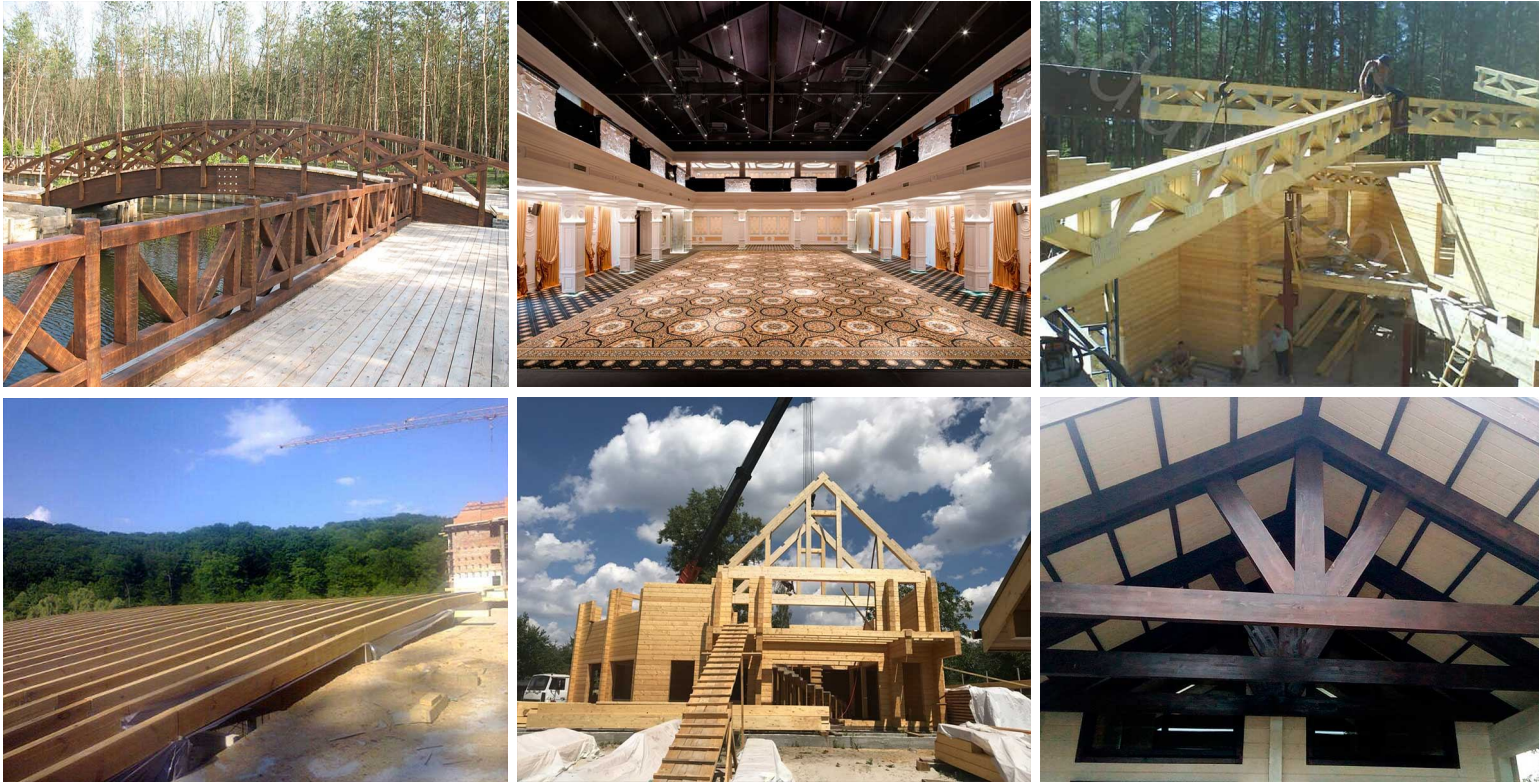

5 Construction of offices

Office buildings of private companies and co-working spaces can have a unique design and unique style. We are the authors of many non-standard technical solutions and innovations in modern construction, so non-standard solutions are a common thing for us. Our innovative approach will help realize your special style!

6 Truss bridges, large-span structures, wooden houses

The production of wide-span wooden floors, wooden beams, trusses allows for the construction of any kind of buildings, including swimming pools, hotels, stables, bridges, industrial workshops and warehouses, offices, residential buildings, etc.

Construction of modular houses and buildings

Our production mass-produces modular buildings and houses. In the presentation you can see a brief selection of our developments:

The group of companies "Modern Wooden Houses" and "Bionic-technologies" has developed documentation for which it produces both modular houses for year-round use, and public and business buildings.

We offer ready-made modular projects and the implementation of modular buildings for a wide range of applications. These are residential buildings, houses on the water, penthouses, hotels, office mobile units, restaurants, kindergartens, schools, apartment buildings.
